PERMIT NUMBER: ACT/015/025

DATE OF INSPECTION: 7/8/97

(Comments are Numbered to Correspond with Topics Listed Above)

1. PERMITS, CHANGE, TRANSFER, RENEWAL, SALE

Permit amendment ACT/007/038-97B, which involves the installation of approximately 260 cubic yards of blacktop in the scalehouse area and its adjacent primary roads, has been returned to the permittee for deficiencies. Mr. Reynolds indicated that this amendment has been placed on the back burner so that the amendment addressing the new Federal lease application can be concentrated on.

4b. HYDROLOGIC BALANCE: SEDIMENT PONDS AND IMPOUNDMENTS

It was observed that the permittee has re-initiated the cleanout of sediment pond "A". From what was seen remaining in the FEL's bucket, the material appears to be quite soupy. A project of this type often takes several months to complete, as additional drying time is usually needed to improve the handling characteristics of the muck.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining.
